Mr. James Warr  
Box 812  
Riverton, Utah 84065

Dear Mr. Warr:

Re: Amended Notice of Intention to Commence Small Mining Operations, Yankee Project, S/049/022, Utah County, Utah

On September 16, 1992, the Division received your supplemental information regarding the variances requested for the Yankee Project. As described in your letter, the project area will be limited to the area previously impacted by mining operations. The area would more specifically be described as being adjacent to the Belorophan Mine adit, then east and down along the stream channel to the Gulch Road/Lower Road intersection, including the area surrounding the two adjacent Yankee Mine adits. This is the approximate area depicted in the drawing enclosed with your letter.

The Division will need to perform a site inspection prior to granting these variances. I will be contacting you to coordinate this inspection as soon as possible, and weather permitting.

Item 5 of the Operation and Reclamation Practices was included in your variance request. This item deals with the removal, isolation or neutralization of all toxic materials in a manner compatible with federal and state regulations. The Division cannot grant a variance for this item for your project; however, these actions will not be required if there are not toxic materials located on the site. Please be advised that under the Comprehensive Environmental Recovery, Compensation and Liability Act (CERCLA) the EPA may recover hazardous site clean-up costs from parties who have owned, operated, generated or transported certain materials.

I apologize for the lengthy delay in responding to your letter. Thank you for your continued cooperation. If you have any questions regarding this letter, please do not hesitate to contact me.

Sincerely,

A handwritten signature in cursive script, reading "Anthony A. Gallegos". The signature is written in dark ink and is positioned above the printed name and title.

Anthony A. Gallegos  
Reclamation Engineer
